Arlington, VA 22202

NOV 0 5 2002

Dear Director Rogan:

OFFICE OF PETITIONS

This is in regard to the application for patent term extension for U.S. Patent No. 6,083,953 filed by Syntex under 35 U.S.C. § 156. The human drug product claimed by the patent is Valcyte (valganciclovir hydrochloride), which was assigned new drug application (NDA) No. 21-304.

A review of the Food and Drug Administration's official records indicates that this product was subject to a regulatory review period before its commercial marketing or use, as required under 35 U.S.C. § 156(a)(4). Our records also indicate that it represents the first permitted commercial marketing or use of the product, as defined under 35 U.S.C. § 156(f)(1), and interpreted by the courts in Glaxo Operations UK Ltd. v. Quigg, 706 F. Supp. 1224 (E.D. Va. 1989), aff'd, 894 F. 2d 392 (Fed. Cir. 1990).

The NDA was approved on March 29, 2001, which makes the submission of the patent term extension application on May 24, 2001, timely within the meaning of 35 U.S.C. § 156(d)(1).

Should you conclude that the subject patent is eligible for patent term extension, please advise us accordingly. As required by 35 U.S.C. § 156(d)(2)(A) we will then determine the applicable regulatory review period, publish the determination in the *Federal Register*, and notify you of our determination.

Please let me know if we can be of further assistance.

Sincerely yours,

Jane A. Axelrad

Associate Director for Policy
